D.2 Custom Validation Rules

D.2.1 Submitted File Name

These rules are applicable to all uploaded files, both in CSV and FpML formats.

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
hktr-file-name-1	Check if the file extension of the uploaded file is either “CSV” or “XML” (case insensitive)	--	--
hktr-file-name-2	Check if the file name is in the following format: treq-<participant id>-<generation date>-<user file reference>.xxx	--	--
hktr-file-name-3	Check if the participant ID in the file name is the same as the participant of the current login user / the participant implied by the submission channel	--	--
hktr-file-name-4	Check if the generation date in the file name is in YYYYMMDD format	--	--
hktr-file-name-5	Check if the user file reference contains 1-30 characters	--	--
hktr-file-name-6	Check if the user reference contains only alphanumeric characters and underscore.	--	--
hktr-file-name-7	For purpose being “Valuation”, check if the file name is in the following format: vreq-<participant id>-<generation date>-<user file reference>.xxx	--	--

D.2.2 File Header and File Content

These rules are applicable to all uploaded files, both in CSV and FpML formats.

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
hktr-file-header-1	Context: File header Description: The message version must be supported by the system. (i.e. FpML - version 5.2 / 5.5 / 5.7, CSV – version 1.0 / 2.0 / 2.1 / 3.0)	File header: RequestDocumentHeader message version: version	File header: File Level Request message version: Version
hktr-file-header-2	Context: File header Description: The file reference from file name should be equal to the file reference in file content	File header: RequestDocumentHeader file reference in file content: fileReference	File header: File Level Request file reference in file content: File Reference
hktr-file-header-3	Context: File header Description: The file reference should not be already used (Note: File reference + submitting party is the key of the record)	File header: RequestDocumentHeader file reference: fileReference submitting party: submittingParty	File header: File Level Request file reference: File Reference submitting party: Submitting Party (Type) and Submitting Party (ID)
hktr-file-header-5	Context: File header Description: Number of records found in the submitted file must match the number of items specified in the file header .	File header: RequestDocumentHeader number of items: numItems	File header: File Level Request number of items: Number of Trade Event Requests (Trade) / Number of Valuation Requests (Valuation)
hktr-file-header-	Context: Fileheader Description:	File header: RequestDocumentHeader	File header: File Level Request

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
6	When the value “Reporting” is specified in the purpose field in file header , check if the reporting service is available in HKTR system.	Purpose field: purpose	Purpose field: Purpose
hktr-file-header-7	Context: File header Description: Check if the number of items specified in the file header is between 1 and 125 (inclusive)	File header: RequestDocumentHeader number of items: numItems	File header: File Level Request number of items: Number of Trade Event Requests
hktr-file-header-8	Context: File header Description: Check if the submitting party specified in file header is the same as the implicit identification in the submitting channel.	File header: RequestDocumentHeader submitting party: submittingParty	File header: File Level Request submitting party: Submitting Party (Type) and Submitting Party (ID)
hktr-file-header-9	Context: File header Description: Check if the purpose field in file header aligns with the file service (i.e. confirmation / reporting / valuation, determined from the submitting page) provided. Applicable to web submission only.	File header: RequestDocumentHeader Purpose field: purpose	File header: File Level Request Purpose field: Purpose
hktr-file-header-10	Context: File header Description: Check if the purpose field in file header is either "Confirmation", "Reporting" or “Valuation”.	File header: RequestDocumentHeader Purpose field: purpose	File header: File Level Request Purpose field: Purpose
hktr-file-header-11	Context: File header Description: For valuation reporting, check if the number of items	File header: RequestDocumentHeader number of items:	File header: File Level Request number of items:

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
	specified in the file header is between 1 and 2500 inclusive for FpML, and between 1 and 5000 inclusive for CSV.	numItems	Number of Valuation Requests
hktr-file-content-1	Context: File Content Description: The file uploaded should not contain characters that are not in the allowable character set.	N/A	N/A
hktr-file-content-2	Context: File Content Description: The file uploaded should not be empty.	N/A	N/A

D.2.3 File Details

D.2.3.1 FpML Specific Rules - Miscellaneous

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
fpml-shared-18-r	<p>Context: Party elements defined in all kinds of request elements</p> <p>Description: Each party/partyId must be unique.</p>	<p>All kinds of request elements: <tr:eventactivityreport </tr:eventactivityreport <tr:eventactivityreportretracted< p=""> </tr:eventactivityreportretracted<></p>	<p>Not applicable.</p> <p>This rule is FpML specific.</p>
hktr-fpml-misc-1-r	<p>Context: Trade</p> <p>Description: For FpML 5.2, product can only be substituted by the swap element or the fxSingleLeg element,</p> <p>For FpML 5.5, product can only be substituted by the swap element or the fxSingleLeg element, or the fxOption element, or the capFloor element, or the fra element, or the swaption element, or the varianceSwapTransactionSupplement element, or the equitySwapTransactionSupplement element, or the equityOptionTransactionSupplement element, or the dividendSwapTransactionSupplement element</p> <p>For FpML 5.7, product can only be substituted by the creditDefaultSwap element, or the commoditySwap element, or the commodityOption element, or the commodityForward element</p>	As described.	<p>Not applicable.</p> <p>This rule is FpML specific.</p>
hktr-fpml-misc-2-r	<p>Context: RequestDocumentDetails</p> <p>Description: <tr:eventactivityreport header="" onbehalfof="" or<br=""></tr:eventactivityreport> <tr:eventactivityreportretracted header="" onbehalf<="" p=""> </tr:eventactivityreportretracted></p>	<p>As described.</p> <p>The reporting party in file header: RequestDocumentHeader/reportingParty</p>	<p>Not applicable.</p> <p>This rule is FpML specific.</p>

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
	Of, if present, should be the same as the reporting party in file header .		
hktr-fpml-misc-3-r	Context: RequestDocumentDetails Description: /tr:eventActivityReport/header/sentBy or /tr:eventActivityReportRetracted/header/sentBy must be the same as the submitting party in the file header .	As described. The submitting party in file header: RequestDocumentHeader/submittingParty	Not applicable. This rule is FpML specific.
hktr-fpml-misc-4-r	Context: All events defined under Events.model Description: Only event types under the TR namespace are supported. Official FpML event types cannot be used.	As described.	Not applicable. This rule is FpML specific.
hktr-fpml-misc-5-r	Context: RequestDocumentDetails Description: Check if the file items (/tr:eventActivityReport, /tr:eventActivityReportRetracted) comply with the purpose in the file header .	File header: RequestDocumentHeader message version: purpose	Not applicable. The rule is FpML specific.
hktr-fpml-misc-6-r	Context: RequestDocumentDetails Description: /tr:eventActivityReport/tr:reportingFor/tr:reportingPartyReference should be equal to the reporting party in file header .	File header: RequestDocumentHeader reporting party: reportingParty	Not applicable. The rule is FpML specific.
hktr-fpml-misc-7-r	Context: RequestDocumentDetails Description: Check if the values are present and within the following coding schemes supported by HKTR system. - messageAddressScheme - correlationIdScheme	As described.	Not applicable. The rule is FpML specific.

Rule ID	Description	FpML Location of Involved Field Group or Field	CSV Location of Involved Field Group or Field
	<ul style="list-style-type: none"> - partyIdScheme - productTypeScheme (FpML 5.2 only) - tradeIdScheme - eventIdScheme - productIdScheme - Equity's instrumentIdScheme (FpML 5.5 only) - Credit's instrumentIdScheme (FpML 5.7 only) 		
hktr-fpml-misc-8-r	Context: RequestDocumentDetails Description: If the request is submitted by agent, <onBehalfOf> tag must exist.	As described.	Not applicable. This rule is FpML specific.
hktr-fpml-misc-9-r	Context: RequestDocumentDetails Description: If the request is submitted by reporting party itself, <onBehalfOf> tag must not exist.	As described.	Not applicable. This rule is FpML specific.
hktr-fpml-misc-11-r	For FpML 5.2, Action: Request Event: New Trade , Backloading , Amendment Description: Product Type must be InterestRateSwap in <swap> element, or FxNonDeliverableForward in <fxSingleLeg> element.	For FpML 5.2, Product Type: /trade/swap/productType/@productTypeScheme=" http://www.fpml.org/coding-scheme/product-type-simple " Or /trade/fxSingleLeg/productType/@productTypeScheme=" http://www.fpml.org/coding-scheme/product-type-simple "	Not applicable. This rule is FpML specific.
