

System Configuration Requirements for eiMBT and eiCMT

1. Recommended System Configuration of eMBT and eCMT

eMBT and eCMT are certified to run on the following operating systems, browser versions as well as SWIFT components. Relevant technical support may not be provided to members who adopt system configurations other than those listed below.

1.1 Operating System and browser

Microsoft Windows and Internet Explorer (IE) version:	(a) Windows 7 Professional SP1 – 32bit and IE11 (b) Windows 7 Professional SP1 – 64bit and IE11 (c) Windows 8.1 – 32bit and IE11 (d) Windows 8.1 – 64bit and IE11 Latest IE patch level is recommended.
---	---

1.2 SWIFT Related

WebAccess version:	(a) 7.0.40 (b) 7.0.50 (c) 7.0.55
JAVA version:	(a) Java 6 (Update 27 and up to Update 151) (b) Java 7 (Update 7 and up to Update 141) (c) Java 8 (Base and up to Update 131) Note: SWIFT only supports 32 bit versions of the JRE
Digital certificate:	Digital certificate issued by SWIFT

Members should contact SWIFT at 2107 8777 for further details on the above software products to ensure that their SWIFTNet connection and infrastructure, such as SWP, SAG, firewalls etc., are in place.

2. Recommended System Configuration of iCMT/iMBT

iCMT/iMBT is certified to run on the following operating systems and browser versions. Relevant technical support will not be provided to members who adopt system configurations other than those listed below.

Microsoft Windows and Internet Explorer (IE) version:	(a) Windows 7 Professional SP1 – 32bit and IE11 (b) Windows 7 Professional SP1 – 64bit and IE11 (c) Windows 8.1 – 32bit and IE11 (d) Windows 8.1 – 64bit and IE11 Latest IE patch level is recommended.
Digital certificate:	Digital certificate issued by the following authorized issuers: (a) Local Certification Authority: (i) Digi-Sign Certification Services Limited (“Digi-Sign”) website: http://www.dg-sign.com ; (ii) Hongkong Post Website: http://www.hongkongpost.com ; (b) Global Certification Authority: (i) Geotrust Website: http://www.geotrust.com ; (ii) VeriSign ¹ Website: http://www.verisign.com ; (iii) Symantec Website: http://www.symantec.com ; (iv) Entrust (new) Website: http://www.entrust.com ; (v) IdenTrust (new) Website: http://www.identrust.com ; <small>¹ Security Business of VeriSign has been acquired by Symantec in 2010.</small>

Despite that HKICL has implemented multiple levels of security controls on access from the internet (including firewalls, application access authentication), internet connectivity may have security implications on members’ networks and computers. While members can access the iCMT/iMBT using any internet access technology and any Internet Service Provider (ISP), the following basic levels of security for access to the iCMT/iMBT via the internet should be attained:

- Strong firewalls are implemented
- Systems are screened with virus protection software
- Systems are screened with anti-spyware software
- End to end encryption of data between the client and server using SSL
- Comprehensive password policies

~~ END ~~
