

Part 1 - Procedure to enable the TLS 1.2 setting

1. Open Internet Explorer and select **Internet Options** from the Tools menu¹.
2. Select the **Advanced** tab.
3. Check the “*Use TLS 1.2*” option.

4. Click **Apply** and **OK** to close the Internet Options window.

¹ Users should consult with their IT support team on whether the setting can be amended by users directly or must be done by IT through Group Policy.

Part 2 - Procedure to verify the connectivity using TLS 1.2 in HKICL's Member Test environment

1. For accessing various systems in the Member Test environment, open Internet Explorer to login SWIFT WebAccess and then click on relevant URL's:

For Direct Participants/CMU Participants to access eMBT/eCMT via SWIFT WebAccess –
<https://hkicl-rtgs-gui-pilot-stptest.swiftnet.sipn.swift.com/stp/login>

For Global Users to access eMBT via SWIFT WebAccess –
<https://hkicl-rtgs-gui-pilot-stptest.swiftnet.sipn.swift.com/stp/ndp/login>

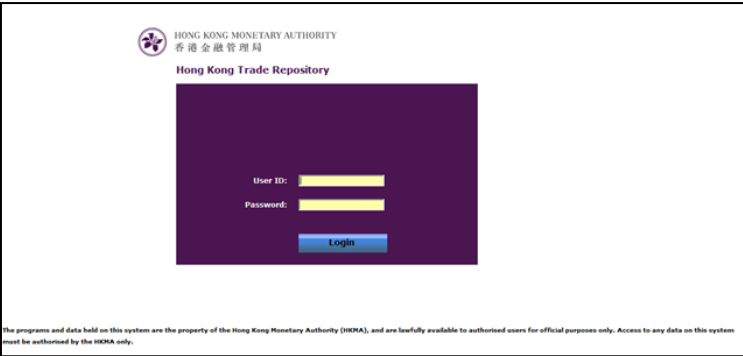

For TR Participants to access HKTR UI Function via SWIFT WebAccess -
<https://hkicl-tr-pilot-memtest.swiftnet.sipn.swift.com/tr/mem/login>
 or
<https://hkicl-tr-pilot-simtest.swiftnet.sipn.swift.com/tr/sim/login>

2. A successful logon screen will be displayed, which indicates that the connectivity test is completed successfully using TLS 1.2 protocol:

For eMBT and eCMT

For HKTR

3. For any connectivity issues, please contact HKICL Service Management at +852 2533 1100 or hkicl@hkicl.com.hk.
